CNN | ORC POLL

Interviews with 1,035 adult Americans conducted by telephone by ORC International on December 16-19, 2013. The margin of sampling error for results based on the total sample is plus or minus 3 percentage points.

The sample also includes 950 interviews among registered voters (plus or minus 3 percentage points)

The sample includes 733 interviews among landline respondents and 302 interviews among cell phone respondents.

21. As you may know, a bill that makes major changes to the country's health care system became law in 2010. Based on what you have read or heard about that legislation, do you generally favor or generally oppose it?
22. (IF OPPOSE) Do you oppose that legislation because you think its approach toward health care is too liberal, or because you think it is not liberal enough?

METHODOLOGY

A total of 1035 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage. Among the entire sample, 33% described themselves as Democrats, 24% described themselves as Republicans, and 43% described themselves as Independents or members of another party

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "N/A".

Question 21

As you may know, a bill that makes major changes to the country's health care system became law in 2010. Based on what you have read or heard about that legislation, do you generally favor or generally oppose it?
