Results in this document are based on interviews from two separate polls conducted on May 2-4 and May 29-June 1, 2014, by ORC International, for a total of 2,011 interviews among all adult Americans, including a total of 1,549 white respondents and 143 African-American respondents. Sampling errors for the combined data are plus or minus 2.5 percentage points for the total sample and for white respondents, and plus or minus 8 percentage points for black respondents. The total combined sample includes 1,404 interviews among landline respondents and 607 interviews among cell phone respondents. Additional details can be found in the methodology section on page 4.
In general, do you think race relations in the United States are very good, fairly good, fairly bad or very bad?

You may remember a famous trial that happened 20 years ago when O.J. Simpson was charged with murdering his former wife and another person. Do you personally believe the charges that O.J. Simpson murdered Nicole Brown Simpson and Ronald Goldman were definitely true, probably true, probably not true, or definitely not true?

**METHODOLOGY**

On May 2-4, 2014, a total of 1,008 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage. Among the entire sample, 32% described themselves as Democrats, 27% described themselves as Republicans, and 41% described themselves as Independents or members of another party. 784 respondents described themselves as white and 71 described themselves as black. 702 respondents were contacted via landlines and 306 were contacted via cell phones.

On May 29-June 1, 2014, a total of 1,003 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage. Among the entire sample, 30% described themselves as Democrats, 23% described themselves as Republicans, and 47% described themselves as Independents or members of another party. 765 respondents described themselves as white and 72 described themselves as black. 702 respondents were contacted via landlines and 301 were contacted via cell phones.

Data from the two polls was aggregated into a single data set. Weighted results from that aggregated data set were used throughout this document.
