

Interviews with 1,018 adult Americans conducted by telephone by ORC International on April 16 - 19, 2015. The margin of sampling error for results based on the total sample is plus or minus 3 percentage points.

This sample includes 615 interviews among landline respondents and 403 interviews among cell phone respondents.

METHODOLOGY

A total of 1,018 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Among the entire sample, 27% described themselves as Democrats, 21% described themselves as Republicans, and 52% described themselves as Independents or members of another party

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "N/A".

Question 7B

Would you say that the following represent a very serious threat to the United States, a moderately serious threat, just a slight threat, or no threat at all?
