

**Interviews with 1,017 adult Americans conducted by telephone by ORC International on June 26-28, 2015. The margin of sampling error for results based on the total sample is plus or minus 3 percentage points. Results in this document labeled “All Americans” or “Total” are based on this sample of 1,017 adults. The sample also includes 890 interviews among registered voters (plus or minus 3.5 percentage points). The full sample includes 611 interviews among landline respondents and 406 interviews among cell phone respondents.**

**Additional interviews were conducted among African-Americans, and combined with the African-Americans contacted in the initial sample of 75 for a total of 303 African-American respondents. The margin of sampling error for results based on this sample of African-Americans is plus or minus 5.5 percentage points.**

**Columns in this document labeled "Whites" show results only for the 727 respondents in the initial sample who described themselves as white in a question on racial background and did not describe themselves as Hispanic or Latino in a separate question on ethnicity. (Sampling error for non-Hispanic whites is +/-3.5 percentage points.) Columns in this document labeled "Blacks" refer to all respondents who described themselves as black or African-American and did not describe themselves as Hispanic or Latino in a separate question on ethnicity.**

**Trend results for racial groups are shown only for polls which had enough African-American respondents to produce statistically valid results.**

---

**EMBARGOED FOR RELEASE:  
Wednesday, July 1 at 6:00 a.m.**

## METHODOLOGY

A total of 1,017 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Among the entire sample, 28% described themselves as Democrats, 23% described themselves as Republicans, and 49% described themselves as Independents or members of another party

In addition 252 interviews were conducted with African-Americans drawn from a separate sample of landline telephone numbers in areas where at least 30% of households are African American.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "N/A".

Question 5A

How important will each of the following issues be to your vote for president next year -- will it be extremely important, very important, moderately important, or not that important?

A. The economy

Base = Total Sample

I'm going to read a list of people who may be running in the Democratic primaries for president in 2016. After I read all the names, please tell me which of those candidates you would be most likely to support for the Democratic nomination for president in 2016, or if you would support someone else.

Question 31D

Now I'm going to read you a few phrases which describe the candidates, and for each one, tell me who you think that phrase best describes, regardless of who you are voting for. Please feel free to name a candidate even if you may not be voting for that person. Which Democratic candidate do you think:

D. Would be the strongest leader

Base = Democrats
