METHODOLOGY

A total of 2,009 Iowa adults were interviewed by telephone statewide by live interviewers calling both landline and cellphones. All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect statewide Census figures for gender, race, age, education and region of the state.

Respondents were asked questions about whether they are registered to vote, their likelihood of voting, past voting behavior, and interest in the campaign. Based on the answers to those questions, 1,046 respondents were classified as likely caucus-goers, including 548 who were likely to participate in the Republican presidential caucus and 498 who were likely to participate in the Democratic presidential caucus.

The Iowa regions are composed of the following counties: the "East" region is composed of Cedar, Clinton, Dubuque, Jackson, Johnson, Jones, Linn, Muscatine and Scott counties; the "East Central" region is composed of Allamakee, Benton, Black Hawk, Bremer, Buchanan, Butler, Chickasaw, Clayton, Delaware, Des Moines, Fayette, Floyd, Grundy, Henry, Howard, Iowa, Jefferson, Keokuk, Lee, Louisa, Mitchell, Poweshiek, Tama, Van Buren, Wapello, Washington and Winneshiek counties; the "Des Moines Area" region is composed of Dallas, Madison, Polk, Story and Warren counties; the "Central" region is composed of Adair, Appanoose, Boone, Calhoun, Carroll, Cerro Gordo, Clarke, Davis, Decatur, Emmet, Franklin, Greene, Guthrie, Hamilton, Hancock, Hardin, Humboldt, Jasper, Kossuth, Lucas, Mahaska, Marion, Marshall, Monroe, Palo Alto, Pocahontas, Ringgold, Union, Wayne, Webster, Winnebago, Worth and Wright counties; and the "West" region is composed of Adams, Audubon, Buena Vista, Cass, Cherokee, Clay, Crawford, Dickinson, Fremont, Harrison, Ida, Lyon, Mills, Monona, Montgomery, O'Brien, Osceola, Page, Plymouth, Pottawattamie, Sac, Shelby, Sioux, Taylor and Woodbury counties.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the population of Iowa to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed.
