Nevada

Interviews with 1,006 adult Nevadans conducted by telephone by ORC International on February 10 - 15, 2016. The margin of sampling error for results based on the total sample is plus or minus 3 percentage points.

The sample also includes 245 who were likely to participate in the Republican presidential caucus and 282 who were likely to participate in the Democratic presidential caucus.

This sample includes 606 interviews among landline respondents and 400 interviews among cell phone respondents.

METHODOLOGY

A total of 1,006 Nevada adults were interviewed by telephone statewide by live interviewers calling both landline and cellphones. All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect statewide Census figures for gender, race, age, education and region of the state.

This sample includes 606 interviews among landline respondents and 400 interviews among cell phone respondents.

Respondents were asked questions about whether they are registered to vote, their likelihood of voting, past voting behavior, and interest in the campaign. Based on the answers to those questions, 658 respondents were classified as likely caucus-goers, including 245 who were likely to participate in the Republican presidential caucus and 282 who were likely to participate in the Democratic presidential caucus.

The Nevada regions are composed of the following counties: the "Washoe County" region is composed of Washoe County; the "Clark County" region is composed of Clark County; the "Rest of State" region is composed of Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, White Pine and Carson City counties.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the population of Nevada to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed.
