

Interviews with 1,001 adult Americans conducted by telephone by ORC International on June 16-19, 2016. The margin of sampling error for results based on the total sample is plus or minus 3 percentage points.

The sample also includes 891 interviews among registered voters (plus or minus 3.5 percentage points).

This sample includes 601 interviews among landline respondents and 400 interviews among cell phone respondents.

**EMBARGOED FOR RELEASE:
Thursday, June 23 at 6:00 a.m.**

Q24. Donald Trump is the chairman and president of the Trump Organization, a company involved in real estate, hotels, entertainment, golf courses and other retail efforts. Now that Donald Trump is the presumptive nominee of the Republican Party, should he continue to hold that position or should he step down until he is no longer involved in politics?

June 16-19
2016

Continue to hold position	28%
Step down until no longer involved in politics	69%
No opinion	3%

Q25. The Clinton Foundation is a charitable organization founded by former president Bill Clinton after his presidency ended. Hillary Clinton resigned from the foundation's board of directors after declaring her candidacy for president. Should Bill Clinton continue to work with the foundation or should he step down until Hillary Clinton is no longer involved in politics?

June 16-19
2016

Continue to work with foundation	60%
Step down until no longer involved in politics	38%
No opinion	2%

METHODOLOGY

A total of 1,001 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Among the entire sample, 30% described themselves as Democrats, 23% described themselves as Republicans, and 47% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "NA".
