METHODOLOGY

A total of 1,003 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Among the entire sample, 28% described themselves as Democrats, 24% described themselves as Republicans, and 48% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "NA".

Are you satisfied or dissatisfied with the candidates you have to choose from for president this year?

Question 22
As you may have heard, U.S. intelligence officials say they have high confidence that the Russian government is behind the recent hack of emails from the Democratic National Committee. Regardless of whether you think the Russian government is trying to influence the election, which is a bigger concern to you personally:
That Donald Trump would suggest Russian hackers should try to get Hillary Clinton's emails:
That Russian hackers were able to steal emails from the DNC, and could have more emails that they haven't yet release:
