

Nevada

Interviews with 1,006 adult Nevadans conducted by telephone by ORC International on October 10-15, 2016. The margin of sampling error for results based on the total sample is plus or minus 3 percentage points.

The Nevada sample also includes 862 interviews among registered voters (plus or minus 3.5 percentage points) and 698 interviews among likely voters (plus or minus 3.5 percentage points).

In Nevada, 503 interviews were conducted among landline respondents and 503 interviews among cell phone respondents.

METHODOLOGY

A total of 1,006 Nevadans adults were interviewed by telephone statewide by live interviewers calling both landline and cellphones. All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect statewide Census figures for gender, race, age, education and region of the state.

This sample includes 503 interviews among landline respondents and 503 interviews among cell phone respondents.

Respondents were asked questions about whether they are registered to vote, their likelihood of voting, past voting behavior, and interest in the campaign. Based on the answers to those questions, 698 respondents were classified as likely voters. Among those likely voters, 35% described themselves as Democrats, 30% described themselves as Republicans and 35% described themselves as independents or members of another party.

The Nevada regions are composed of the following counties: the "Washoe County" region is composed of Washoe County; the "Clark County" region is composed of Clark County; the "Rest of State" region is composed of Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, White Pine and Carson City counties.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the population of Nevada to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed.
