MORE ON METHODOLOGY

A total of 1,053 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, 30% described themselves as Democrats, 24% described themselves as Republicans, and 41% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/-3.7 percentage points or less once adjusted for design effect. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a design-effect adjusted sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "N/A".

29. For the next few questions, I'd like you to concentrate on those immigrants who are in this country legally--in other words, immigrants who have permission from the government to live in the United States and have followed all immigration laws. Would you favor or oppose changes in federal law to reduce the number of immigrants who enter the country legally?
