

## THE ULTIMATE EXECUTIVE EXPERIENCE

Our most customizable and exclusive offering, the Inside CNN Protocol Tour provides an in-depth look at television news production at CNN's global headquarters. The tour is an exploration of the company's history and programming as well as a deeper dive into the news production process. The Protocol experience includes stops inside the main studios for CNN, CNN International, and CNN en Español, as well as a view into the HLN studio.

The tour visits the networks' control rooms and Master Control, Media Operations as well as the International and Domestic news rooms. The small group size of the Protocol Tour paired with the tour guide's expertise allows for each tour to be tailored to the specific needs and interests of the guests. All of this adds up to a rare opportunity to see news broadcasting in action from the inventors of 24-hour news.

**The Inside CNN Protocol Tour** is available by appointment only. Each tour can accommodate up to 16 guests. For security purposes, photo ID is required. Guests will receive a unique gift to commemorate their visit.
